

# NDT TRAINING

## FILM AND DIGITAL RADIOGRAPHY TRAINING AND CERTIFICATION OF PERSONNEL

Exceptional training. Limited number of places!

### Important information for those certified in Radiographic Testing Level 2!

- You can gain the knowledge and qualification for RTD1 certification within 3 days
- You can gain the knowledge and qualification for RTD2 certification within 5 days

TÜV THÜRINGEN Poland is the first and only company in Poland to offer courses in digital radiography that enable you to obtain a certificate of competence in this field!

Following the training course, there is a qualifying exam the next day!

(Minimum experience in radiography is required, according to EN ISO 9712:2012).

**ATTENTION!**

Earning such a certificate can open doors to attractive jobs in industrial sectors!

The uniqueness of this form of training lies in the fact that trainees have access to the latest technology in digital radiography, they have the opportunity to learn about the two main types of digital radiography systems:

**CR – computed radiography and DR – direct radiography.**

The undoubted advantage of this form of course is that participants will learn not only how to acquire digital images, but also how to assess the quality of the resulting images and discrepancies, based on the latest standards and regulations.
